

The Clinical Trial Companion App

Making clinical trials safer and easier for patients and researchers alike, day or night, anywhere in the world

- **Simple:** easy-to-use app to support a patient's trial journey
- **Customisable:** centred on the needs of each patient and clinical trial
- **Personal trial plan:** action plan developed specifically for each patient
- **Diary:** provides patients with prompts and reminders on clinical appointments
- **Medication reminders:** sent as prompts
- **Medication instructions:** tailored to each trial
- **Questionnaires:** supports scheduled delivery of questionnaires and PROMs
- **Intelligent analytics:** to support researchers
- **Secure:** data protected and encrypted
- **Multiplatform:** designed for Android and iOS smartphones
- **Created by University of Manchester clinical researchers and two health companies: MEU and ELAROS**
